REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

There was no prior art found by the examiner that suggested modification or combination with the cited art so as to satisfy the combination of all the limitations in claims 1, 16, and 26.

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render limitations **"the processor, the color measurement unit and the bi-directional interface are combined into an independent unit, and wherein the processor incorporates a profile generation program to be started by a starting command supplied from the external device through the bi-directional interface, said profile generation program being adapted to calculate a device profile on the basis of the digital color measurement values produced by the color measurement unit and to make the digital color management values available through the bi-directional interface for acceptance by the external device"**, in combination with the rest of the limitations of claim 1.

As to claim 16, the prior art of record, taken alone or in combination, fails to disclose or render limitations **"wherein the processor of the profiling device incorporates a profile generation program to be started by a start command provided by the processor-based control of the electronic projector and the processor calculates a device profile on the basis of the color measurement values produced by the color measurement unit, the device profile being provided by the processor to the profiling device for adjustment of the**

transformation stage and control of the adjustment of the transformation stage on the basis of the device profile”, in combination with the rest of the limitations of claim 16.

As to claim 26, the prior art of record, taken alone or in combination, fails to disclose or render limitations **“colorimetrically measuring the samples image wise reproduced by the display device and determining color measurement values corresponding to each sample; detecting the occurrence of the identification pattern by analysis of the measured color measurement values and analyzing such color measurement values for process control in such a way that, after the occurrence of the identification pattern, a device profile of the display device is calculated from the color measurement values of the subsequently following color samples of the color table and the preset color values forming the basis of these color samples, and adjusting the display device with the device profile.”**, in combination with the rest of the limitations of claim 26.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
